Maintenance and Repairs Boat Landings**

An item on this month's agenda is maintenance and repairs for the boat landings. In addition to the pier repairs, that were addressed in yesterday's e-mail, we also have some grounds maintenance issues to address. As far as I know, there has been no grounds maintenance performed at the landing in the past couple of years. Please see the photos I have attached; they include some the grounds maintenance needs and a photo of the new signs that were just received this week. Andy has the signs and will be prepping them for installation. He and I both agree that it would be nice to have them installed prior to the May 1st fishing opener. Below I have a list of maintenance needs that we should address prior to the May 1st fishing opener. Please note that I am asking the Town of Elcho to give us an assist on several items.

Request of Town of Elcho

- Install the piers prior to May 1st.
- South Shore Landing, grade and add gravel as needed to access road/parking lot
- South Shore Landing, add gravel with fines to the transition area from the boat ramp to the pier access, tamp firm.
- South Shore Landing, cleanup and remove rocks and gravel debris, appears to be a result of plowing.
- South Shore Landing, remove brush pile from side of parking lot, at the exit. This looks like it may be left over from The Storm.
- West Shore Landing, fill pothole in the middle of the drive approach.

Maintenance Needs

- Remove old signage and kiosks at all three landings
- Install new signs (Andy is heading up this effort)
- What to do with all three boat landing donation box? Replace sign with PLP&RD as the responsible party? What to do with this money?

Upper Post South Shore Landing Maintenance Needs

- Reinstall the pull forward signs, these signs are either on the ground or bent at a 45-degree angle.
- Reinstall Entrance sign at top of hill
- Straighten BOAT LANDING sign at corner of Post Lake Drive and Point Lane. Also, clear obstructing tree branches, property owner's approval will be needed.
- Rake and remove leaf litter and other debris from green spaces
- Mow green areas
- Prune shrubs.

Upper Post West Shore Landing

- Remove (2) wheels that have been duped on site
- Rake and dress-up area near the lake access.
